

**2020-2021 ACADEMIC YEAR
ERASMUS + SUMMER TERM APPLICATION ANNOUNCEMENT**

Student Mobility for Traineeships (SMT)

WHAT IS STUDENT MOBILITY FOR TRAINEESHIPS?

This mobility activity is an internship opportunity at an overseas organization for a student registered at a higher education institution. An “Internship” is a process where a beneficiary **receives professional training and/or gains work experience** at a foundation or organization in another country participating in the program.

The internship activity cannot be used for studies, such as research or analysis related to academic studies, within the scope of a certain curriculum.

The internship is for a student to gain **practical work experience** in the vocational training area that they study.

The internship activity is not expected to be compulsory for the student's diploma program. However, the economic sector for the internship should be related to the **current vocational education program of the student.**

Studies, scientific research and projects that the students carry out to complete or support their own scientific studies are not considered internship activity.

For these activities to be considered as an internship, they must be performed as professional activities with an economic equivalence in the relevant sector, not as part of academic studies.

For example, working in experimental and research studies for product development purposes at a Research and Development (R&D) company, or an R&D unit of a company, or in such works conducted by a higher education institution, or a research center for an economically active company are considered within the scope of internship activity.

In the post-graduation internship activity, **the application must be made before the student graduates (when he/she is currently an associate, undergraduate or graduate student).**

Graduated students can not apply for the mobility.

Internship mobility after graduation must be completed within 12 months of graduation.

Students who froze their registration cannot benefit from the mobility.

Organizations that will host the internship can be enterprises, training centers, higher education institutions and other organizations mentioned in the Erasmus + Program Guide. In this context, an appropriate enterprise means any kind of private or public institution/organization with any economic activity including social economy, regardless of their size, legal status and the economic sector in which they operate.

See:

https://ec.europa.eu/programmes/erasmus-plus/resources/documents/erasmus-programme-guide-2020_en

If the institution in which the internship activity will take place is a **higher education institution** abroad, the work to be performed is not an academic learning activity but it is to obtain practical working experience in the related units.

For the studies that have equivalent credits and will be carried out under the supervision of a advisor but not within the context of internship, students who have completed their graduate studies and are in their thesis year must apply to the activity within the scope of Student Mobility for Studies.

The following institutions are not appropriate for higher education internship activity within Erasmus+:

- European Union institutions and EU agencies

(see: https://europa.eu/european-union/index_en)

- The National Agency and similar institutions conducting EU programs.

Minimum period is 2 full months and **maximum period** is 12 full months in Student Mobility for Traineeships.

If the internship foundation is closed due to holiday during Mobility for Traineeships, the internship might be interrupted. Grants will be given for the period when the foundation is closed. The dates when the internship foundation will be closed must be researched beforehand to ensure the minimum activity period, and the minimum period must be ensured even after holiday period is excluded.

Weekend holidays are not excluded from the activity period.

GRANT SUPPORT

Grants are given to students to help them with the additional costs incurred during their stay abroad.

Grants are only **contributions**, not to cover the student's full costs of the activity.

The countries where student mobility activities can be carried out were divided into 3 groups according to their standard of living and monthly learning and internship grants were determined for the country groups.

The groups of countries and the amount of grants to be given to the students going to these countries are given in the table below:

Country Groups	Host Countries for Mobility	Monthly Grant for Studies (Euro)	Monthly Grant for Traineeship (Euro)
1. and 2. Group Programme Countries	United Kingdom, Denmark, Finland, Ireland, Sweden, Iceland, Liechtenstein, Luxemburg, Norway, Germany, Austria, Belgium, France, Cyprus, Holland, Spain, Italy, Malta, Portugal, Greece,	500	600
3. Group Programme Countries	Bulgaria, Czech Republic, Esthonia, Croatia, Latvia, Lithuania, Hungary, Macedonia, Poland, Romania, Serbia, Slovakia, Slovenia, Turkey	300	400

No additional support is provided to students for round-trips between program countries for study and internship mobility.

Students are paid in 2 installments, **80% of the grant is paid before the mobility and 20% upon the successful completion of the mobility.** Payments are made in Euro.

Students can participate in activities without grant. Students without grant are also subject to general evaluation along with other applicants and go through the same process as the students with grant.

The difference of the student without grant is that the student is not included in the budget calculations and is not paid. The absence of a grant is not a justification for the student not being involved in the selection process.
