## COMPUTER PROGRAMMING SHORT COURSE CONTENTS

## 1. Semester

| Course Code | Course Name | $(T+P)$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL101 | Fundamentals <br> of <br> Programming I <br> (Python) | $3+1$ | 5 | Compulsory |

Content: Programming logic, software development basics will be taught using Python programming language. Variables, expressions, functions, parameters, recursion topics will be covered.

Precondition: None.

| Course Code | Course Name | $(T+P)$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL103 | Data <br> Structures and <br> Algorithms I | $3+1$ | 5 | Compulsory |

Content: Arrays, stacks, queues, trees will be explained. Search, sorting algorithms will be processed and the relationship between algorithm and programming will be taught.

Precondition: None.

| Course Code | Course Name | $(T+P)$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL105 | Unix <br> Programming I | $3+1$ | 5 | Compulsory |

Content: Basic components of programming practice as well as the Unix operating system basics will be taught.

Precondition: None.

| Course Code | Course Name | $(T+P)$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| ATA101 | Ataturk's Principles <br> and History of Turkish <br> Revolution I | $2+0$ | 2 | Compulsory |

İçerik: The Disintegration of the Ottoman Empire, Tanzimat and Reform Edict, I. and II. Constitutional Era, Tripoli and Balkan Wars, World War I, Mondros Armistice Treaty, War of Independence; Amasya Circular, National Congresses, Establishment of the Turkish Grand National Assembly, Announcement of the Republic.

Precondition: None.

| Course Code | Course Name | (T+P) | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |

| TRK101 | Turkish <br> Language I | $2+0$ | 2 | Compulsory |
| :--- | :--- | :--- | :--- | :--- |

Content: Language-thought relationship, language-culture relationship, the importance of language in social life, world languages and the place and properties of Turkish among these languages; state and problems of contemporary Turkish; Turkish spelling rules; effective reading and listening; general rules of written and oral expression; intellectual order, paragraph and expression forms; official correspondence.

Precondition: None.

| Course Code | Course Name | (T+P) | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| DIL101 | General English I | $2+0$ | 2 | Compulsory |

Content: To be able to use basic daily expressions; introducing themselves, second and third person; to be able to ask questions about personal information and to answer such questions.

Precondition: None.

| Course Code | Course Name | (T+P) | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| SEG001 | Manifest of <br> Istinye I | $0+1$ | 1 | Compulsory |

Content: Getting used to and adapting to university life.
Precondition: None.

## 2. Semester

| Course Code | Course Name | (T+P) | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL102 | Fundamentals <br> of <br> Programming <br> II (C) | $3+1$ | 5 | Compulsory |

Contents: Loops, advanced functions, recursion topics will be covered in detail on the first course of the first semester and practices will be made in C programming language.

Precondition: BIL101.

| Course Code | Course Name | $(\mathrm{T}+\mathrm{P})$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL104 | Data | $3+1$ | 5 | Compulsory |

|  | Structures and <br> Algoritms II |  |  |  |
| :--- | :--- | :--- | :--- | :--- |

Content: Complex data structures and advanced algorithms on simple data structures will be examined and explained. Basic algorithm techniques such as brute-force algorithms, splitmanage approaches will be taught.

Precondition: BIL103.

| Course Code | Course Name | $(T+P)$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL106 | Unix <br> Programming <br> II | $3+1$ | 5 | Compulsory |

Content: As the continuation of the first semester, unix programming advanced topics will be covered.

Precondition: BIL105.

| Course Code | Course Name | (T+P) | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| ATA102 | Ataturk's <br> Principles and <br> History of <br> Turkish <br> Revolution II | $2+0$ | 2 | Compulsory |

Content: Revolutions in the political field, political parties and attempts to transition to multiparty political life, revolutions in the field of law, regulation of social life, innovations in the economic field, Turkish foreign policy in the period of 1923-1938, Turkish foreign policy after Atatürk

Precondition: None.

| Course Code | Course Name | (T+P) | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| TRK102 | Turkish <br> Language II | $2+0$ | 2 | Compulsory |

Content: Written expression types, types of oral expression, scientific research methods, types of oral presentation.

Precondition: None.

| Course Code | Course Name | (T+P) | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| DIL102 | General English <br> II | $2+0$ | 2 | Compulsory |

Content: In this course, students are expected to learn basic expressions about personal information, family information, shopping, residence, business information, asking and describing, public transportation vehicles in daily life.

Precondition: None.

| Course Code | Course Name | $(T+P)$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| SEG002 | Manifest of <br> İstinye II | $0+1$ | 1 | Compulsory |

Content: Getting used to and adapting to university life.
Precondition: None.
3. Semester

| Course Code | Course Name | $(T+P)$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL201 | Web <br> Programming I <br> (PHP) | $2+2$ | 5 | Compulsory |

Content: Creating websites using the PHP programming language will be handled practically. Web programming logic will be explained on applications.

Precondition: None.

| Course Code | Course Name | $(T+P)$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL203 | Object <br> Oriented <br> Programming <br> $(C++)$ | $3+1$ | 5 | Compulsory |

Content: Object oriented programming approach will be covered. Concepts such as class structure, objects, inheritance and polymorphism will be discussed. C ++ programming language will be used in applications.

Precondition: None.

| Course Code | Course Name | $(\mathrm{T}+\mathrm{P})$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL205 | Database <br> Systems I | $2+2$ | 5 | Compulsory |

Content: Database systems, queries, relational database modeling topics will be covered.

Precondition: Yok.

| Course Code | Course Name | $(T+P)$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL291 | Graduation <br> Project I | $0+5$ | 5 | Compulsory |

Content: The project determined by the student about the field he/she wants to specialize will be studied.

Precondition: If the student can graduate next semester.

| Course Code | Course Name | $(T+P)$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL281 | Vocational <br> Study | $0+10$ | 1 | Compulsory |

Content: 10 working days compulsory internship or professional work project in summer term.

Precondition: To complete the first year in the program.
4. Semester

| Course Code | Course Name | (T+P) | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL202 | Web <br> Programming <br> II (JavaScript) | $2+2$ | 5 | Compulsory |

Content: Web programming script-based coding topics will be covered.

Precondition: BIL201.

| Course Code | Course Name | $(T+P)$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL204 | Mobil <br> Programming <br> (Android/IOS) | $2+2$ | 5 | Compulsory |

Content: Applications will be developed using mobile application platforms. Mobile application requirements and basics will be explained.

Precondition: Yok.

| Course Code | Course Name | (T+P) | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL206 | Database <br> Systems II | $2+2$ | 5 | Compulsory |

Content: Advanced topics in database systems will be explained with examples. Data models will be covered.

Precondition: BIL205.

| Course Code | Course Name | $(T+P)$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL208 | Programming <br> Platforms | $3+0$ | 5 | Compulsory |

Content: Actual, popular, frequently used software development platforms will be introduced and reinforced with examples.

Precondition: None.

| Course Code | Course Name | (T+P) | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL292 | Graduation <br> Project II | $0+5$ | 5 | Compulsory |

Content: The project of the first term can be continued. If it is over, a new project can be made.

Precondition: BIL291.

## PROGRAM ELECTIVE COURSE CONTENTS

| Course Code | Course Name | $(\mathrm{T}+\mathrm{P})$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL001 | Mathematics <br> and Linear <br> Algebra | $3+0$ | 4 | Elective |

Content: Analytical geometry, functions and their science-engineering applications, as well as linear equation systems, matrix algebra, determinants will be covered.

Precondition: None.

| Course Code | Course Name | $(\mathrm{T}+\mathrm{P})$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL002 | Digital <br> Electronics | $3+0$ | 4 | Elective |

Content: Number systems, logic operations, basic circuit elements will be covered.

Precondition: None.

| Course Code | Course Name | $(\mathrm{T}+\mathrm{P})$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL003 | Computer <br> Hardware | $3+0$ | 4 | Elective |

Content: Topics such as computer architectures, computer components, processors will be covered.

Precondition: None.

| Course Code | Course Name | $(T+P)$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL004 | Discrete <br> Mathematics | $3+0$ | 4 | Elective |

Content: A conceptual perspective will be given to mathematical logic, set theory, number theory and algorithm.

Precondition: None.

| Course Code | Course Name | $(\mathrm{T}+\mathrm{P})$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL005 | Computer <br> Networks | $3+1$ | 5 | Elective |

Content: The methods and tools used in network programming will be covered. Network protocols will be explained. Network security issues will be discussed.

Precondition: None.

| Course Code | Course Name | (T+P) | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |

| BIL006 | Artificial <br> Intelligence <br> Basics | $3+0$ | 4 | Elective |
| :--- | :--- | :--- | :--- | :--- |

Content: Theoretical foundations of artificial intelligence will be covered. The difference between concepts such as artificial intelligence, machine learning, deep learning will be explained. Basic algorithms and approaches will be discussed.

Precondition: None.

| Course Code | Course Name | $(T+P)$ | ECTS | Course Type |
| :--- | :--- | :--- | :--- | :--- |
| BIL007 | Graphic <br> Design | $3+1$ | 5 | Elective |

Content: Software development oriented graphic design fundamentals, visual programming issues will be discussed. The student will be given a basis for graphic design.

Precondition: None.
